

Design - Form

Text Property - Style sheet - Automatic

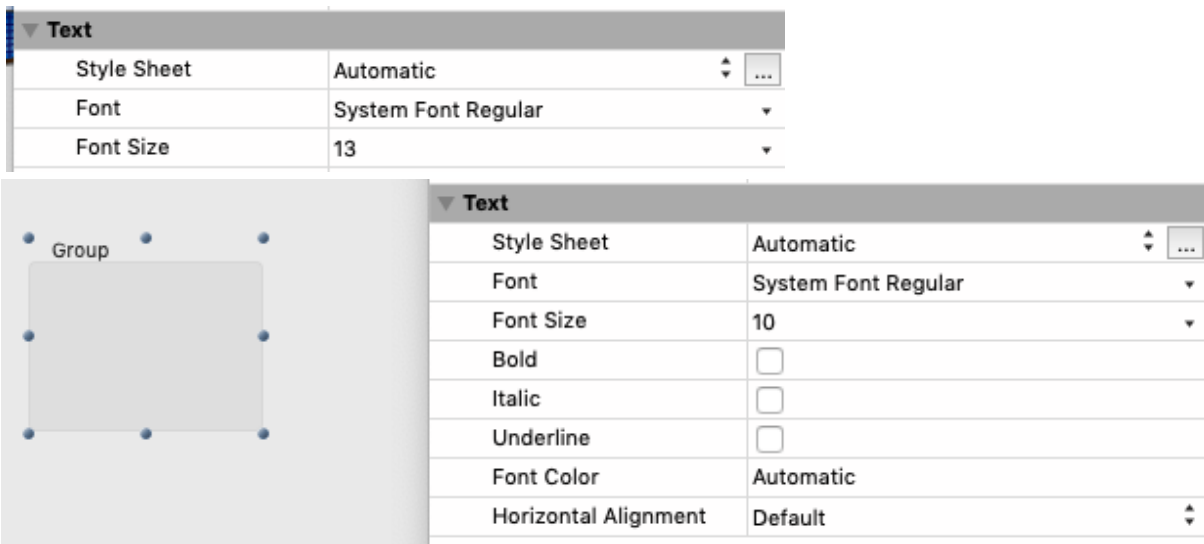

v17 and v18 binary Mac only

Importance level: high Reported 2020-03-26

On a new database, on a Mac only, the "Automatic" style sheet sets the font to "System Font Regular" and 13 points - for my Mac Mojave

This applies to all the objects EXCEPT the following below. I do not see why they should not be set also to "System Font Regular" and 13 points.

It is easy to select all objects and set them to "automatic" but unfortunately because of the ones below this is not possible/advisable.

Scrollable Area

| Text | |
|----------------------|--------------------------|
| Style Sheet | Automatic |
| Font | System Font Regular |
| Font Size | 12 |
| Bold | <input type="checkbox"/> |
| Italic | <input type="checkbox"/> |
| Underline | <input type="checkbox"/> |
| Row Style Array | |
| Font Color | Automatic |
| Row Font Color Array | |
| Horizontal Alignment | Default |
| Vertical Alignment | Center |
